pivotree™
supply chain | **Evolve**

A comprehensive health check for your OMS.

Reduce the complexity of supply chain evolution.

Do it all with Pivotree Evolve

Optimize your OMS.
Compare Sterling OMS versions.

Your OMS is critical to your Supply Chain

But is it up to the mark?

Your Order Management System (OMS) gives you absolute visibility and control over your supply chain. Get it right with Pivotree Evolve, providing you with an assessment of the current state, and detailed insights to help you with optimization and clarity around the next steps to take with your OMS.

Pivotree Evolve, A First-of-its-Kind Sterling OMS Assessment Tool

Evolve gives clear, actionable results for confident decision-making. The OMS analysis tool answers these key questions:

Does my OMS have bugs and vulnerabilities?

Is my code quality up to the mark?

Is my code too complex with more possible break points?

How does my current Sterling OMS version compare with others?

Do I need an OMS upgrade?

Evolve lets you know if you should fix, upgrade or change your current OMS

Speed

Get a detailed overview of your OMS in no time

Quality

Access high quality reports with actionable outcomes and insights

Usability

Run an analysis/ comparison in a few easy steps

What Pivotree Evolve can do for you

Analyze
Detect bugs, vulnerabilities and inefficient/excessive code in your current OMS

- Provide Codebase of OMS/WMS for quality check
- Evolve runs code quality check
- Evolve generates report with bugs and vulnerabilities
- Evolve also measures your code cyclomatic complexity so you're able to increase its stability

Compare
Tally current OMS version against advanced ones to assess if you need an upgrade, see the differences, and know what to expect

- Provide ERD Home zip file
- Choose versions to compare
- Evolve generates Comparison Report elaborating on added/removed features in latest version

Modify
Make multiple changes and replacements to your OMS code, all at once

Are you ready to modernize your OMS, and start the evolution of your next gen Supply Chain Orchestration
